

HIGH and MEDIUM priority sections — Distrito Federal (DF)

Brazilian Presidential Elections 2026 · 1st round (October 4, 2026)

About this annex

This document is an annex to the **Poll-Watching Prioritization by Electoral Section** report and was prepared exclusively from **public TSE information for the 1st round**: poll tapes, voting-machine logs, the polling-place registry and the electorate profile by section.

For Distrito Federal, the table lists the **1,394 sections classified in the ALTO (347) and MÉDIO (1,047) bands**, in descending order of score — from where a poll watcher's presence tends to make the most difference to where it tends to make less. The 5,575 sections in the BAIXO (low) band are not included in this version.

This is a condensed version, designed for reading and printing. The **state's CSV file is more complete**: it includes every section, every indicator and the rankings within the municipality and the state. The report, this annex and the CSV files are available at https://auditoria-eleicoes-2026.org/relatorio_fiscalizacao_2026/.

Important. A high score only means that the section has characteristics that make poll watching more useful. **An anomaly is not fraud**: it is a value outside the pattern of similar sections, almost always with a legitimate explanation. The classification uses no candidate, party or voting result and contains no personal data on voters or poll workers.

How to read the table

uf / municipio_cod / municipio_nome — state, municipality code and municipality name, as published by the TSE.

zona / secao — electoral zone and section number (the voting machine).

local_votacao / local_nome — code and name of the polling place (school, public building, etc.).

tipo_local — type of polling place according to the TSE registry (in Portuguese, as published).

Nota — poll-watching priority score, from 0 to 100. It measures structural and operational vulnerability — not fraud.

Cenário(s) predominante(s) — predominant scenario(s): the factor that weighed most in the section's score (and the second one, when its weight is similar). It tells the watcher what to observe most closely.

Bands. Bands are defined within each state: **ALTO** (high) holds the top 5% of scores in the state; **MÉDIO** (medium), the next 15%. The recommendation is to cover the ALTO sections first, from the opening to the close of voting, and then the MÉDIO ones.

Vulnerability scenarios examined

The score combines ten indicators, each compared with similar sections in the same state. Structural indicators (A) describe the section and the polling place; operational indicators (B) come from the machine's own log on election day.

A1 · Small section — Few eligible voters: each vote weighs more in the section's proportions.

A2 · Few sections at the site — Polling place with few sections (at the limit, a single one): fewer poll workers and watchers nearby.

A3 · Isolated location — Polling place far from other polling places and from the municipal center, in a rural-type area.

A4 · Low biometric enrollment — Low share of voters with registered biometrics: more manual identification is possible (no data for MG, RJ and SP).

A5 · Replacement machine — The section voted on a contingency or reserve machine rather than the original one.

A6 · Low abstention — Abstention well below that of similar sections (same state and size).

B1 · Enabled without biometrics — In the machine log, more voters enabled without fingerprint verification or released by the poll worker than in similar sections.

B2 · Vote bursts — Votes very close to each other (up to 30 s) or a 10-minute vote peak above the section's own pace.

B3 · Votes outside hours — Votes recorded outside the state's official voting window, by the machine clock.

B4 · Administrative interventions — Restarts, suspensions, cancellations, reprints and other administrative events above the usual level, per 100 enabled voters.

Team

Prepared independently, with no ties to parties, candidates or the Superior Electoral Court, using the reproducible methodology described in the report.

Rio de Janeiro, October 15, 2026.

Alexandre Ochiai — Computer Scientist / MBA in Information Technology Management (FGV)

Edison Pignaton de Freitas — PhD in Computer Science and Engineering (Halmstad University and UFRGS)

Leonardo Oliveira de Araújo — PhD in Defense Engineering (IME)

Michel Medeiros — MSc in Statistics and Data Science (UCF)

ALTO (high) band — 347 sections
